STATEMENT OF PROBLEM

To design 30,000 square foot restaurant/bar owned by George Trebec. The structure is to have a contemporary look on the outside and inside. The hundred thousand square foot site on 2020 Northwest Highway must provide parking and storage areas in the back with appropriate landscaping in the front of the structure. This building is going to be built with eco-friendly standards. I am hoping to design a building that will help the environment in the long-run. The total cost of the project should not exceed \$5,000,000 and must be completed by June 5, 2009.
