STATEMENT OF PROBLEM

To design a delivery device for Mr. Tomaso, a teacher of Stevenson high school, Lincolnshire, Illinois. The product must be able to transport an object to travel up and down a zip line and drop the object on a target half way between a distance of 20-feet. The area is located in the entrance of the football field from the visitors' bleachers to the opening in the fence on the right. The final cost of the device is not to exceed \$20 and must be completed by October 1, 2009.
